PayUmoney
WHMCS Documentation

Introduction

This guide will show you how to configure WHMCS version 5.xx & 6.xx to use PayUmoney as your payment processor for payments through Credit Card, Debit Card, Net banking.

Prerequisites

 To Integrate PayUmoney payment gateway, you must :

1.   Have a merchant account with PayUmoney. If haven't already registered, please visit https://www.payumoney.com/ and then register as a merchant.

2. Know your Salt & Key. These are available on the dashboard. If you already have a PayUmoney merchant account, please login at https://www.payumoney.com/ and you will be able to retrieve your salt and key from the "Account details" tab.
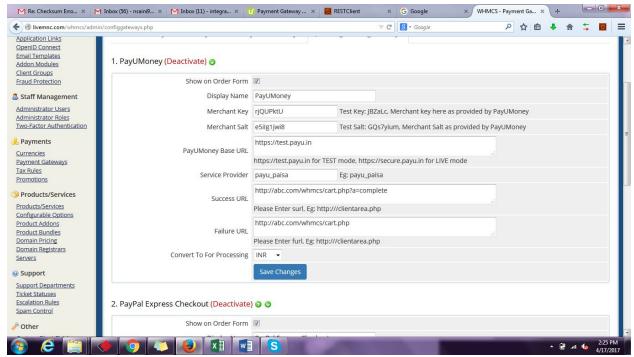

Steps to Integrate

1) Login to your C-Panel and upload the files at given path i.e. **Payu.php** in Gateways Folder and **response.php** in gateways/Callback folder.

2) Login to admin panel.

3) Go to All payment gateways tab, select PayUMoney.

4) The live key and salt you'll get from your PayUmoney account.
   ● For Test Mode: https://test.payu.in
   ● For Live Mode: https://secure.payu.in
   ● Service Provider: payu_paisa

- Enter the Success and failure pages URL of your website.
- Select INR in Convert to for processing.

5) Save the changes and try to make the transaction.

Testing

If you want to test the payment first, you should obtain test values for "Merchant Key"   and "Salt" (not production) and enable checkbox "Enable PayU Test mode)".

Test MID: *4934580*

Test Key: *rjQUPktU*

Test Salt: *e5iIg1jwi8*

Test Authorization Header: *y8tNAC1Ar0Sd8xAHGjZ817UGto5jt37zLJSX/NHK3ok=*

Below are the test card details for doing a test transaction in the testing mode.You may

use the following card details for testing:

Card Name: Any Name

Card Number: 5123 4567 8901 2346 CVV: 123

Expiry Date: 12/2017
